Mini 90

The True Point-of-Care Digital X-ray

For a wider range of clinical application

Light-weight | Safe | Expanded care

CARE. True to our name, we are dedicated to providing and differentiating healthcare solutions to shape a new paradigm in patient care. We strive to bring you innovative, differentiating, clinically relevant MedTech solutions for a healthier tomorrow.

We bring you a comprehensive range of Made-in-India Diagnostic Imaging equipment, Radiology accessories, Digital Technologies and Point-of-Care solutions that can help improve better patient outcomes, and enhance the reach of these solutions to remotest parts of the country to improve quality of life.

Our core competencies in medical technologies, your expertise in delivering care and the combined experience will accelerate this mission and journey of **CARE.**

VISION

Touching every life through innovation in healthcare

MISSION

To ensure profitable operation through energizing leadership, good corporate governance, enhanced customer trust, innovative, efficient customer friendly process, mutually beneficial partnership with associates

Mini 90

The True Point-of-Care Digital X-ray

We brought India's first **True** Digital Radiography system in 2007 and today we bring you MINI 90, The TRUE portable X-ray which has the power to do a wide range of clinical applications and to access X-rays anywhere, any time.

Mini90 is a lightweight, compact, portable design which can be easily used where it matters the most, as in emergencies, home-care, Geriatric-care, accident and trauma, isolation wards, smaller clinics, disaster management sites, etc.

Mini90 is the only truly portable X-ray system as it offers:

- 2 mA to 10 mA power range
- 40 kV to 90 kV penetration capability
- Organ based programmable exposure settings
- Ease of use during emergencies
- SID sensor and track facility for optimum Image quality and safety
- The field size of 43cm X 43cm at 100cms SID to cover a large area on a 17"X17" detector
- Smaller focal spot of 0.88mm
- Bright 7 Inches LCD touch screen display
- Remote switch for exposing
- Fully safe outer lead coated case, and Just 4.0 kg
- The built-in Lithium-polymer batteries allows up to 150 exposures @ 70 kV/5 mAs
- Low-dose, high-resolution images across wider clinical applications like chest, head, spine, and body imaging
- Perfectly designed four-leaf X-ray collimator- to reduce scattered radiation to < 4% of the permissible limit

Technical Specifications

X-ray Generator	kV Range	40-90 kv (1kv step)
	mA Range	2-10 mA
	mAs Range	0.32-20 mAs
Collimator	SID	SID 100cm / 44 cm x 44 cm
	Lamp	LED Lamp / 3.25VDC / 10W
X-ray Tube	Type	Stationary
	Focal Spot	0.8 mm
	Target Angle	16 degrees
	Anode Heat Storage Capacity	8000 J
	Max. Anode Cooling Rate	110 W
	Nominal Anode Input Power at 01s(DC)	1280 W
	Inherent Filtration	0.5 mm Al
Power requirement	Li-polymer Battery	22.2VDC, 2,200 mAh
	Number of Exposures	About 150 times (70 kV, 5mAs)
	AC Power Adapter	AC 100-240V, 50/60Hz (25.2V / 1.5A)
	Charging Time of Battery	About 1.0 - 1.5 hour
Weight	Main Body	Just 4.0 kg
Dimension	Main Body	337.4 x 254.8 x 168.9 mm
Exposing	Click Button	
	Hand Switch	
	Remote Switch	

- New generation CSI flat panel detector 17"X17" and 14"X17", wired and wireless
- High DQE up to 84% for excellent image quality with a resolution of 140-micron
- Durable and robust to handle up to 150 kg of distributed load
- Weight of 3 kg only
- Advanced software technology for easy-of-use
- Real-time logging and shock level alarm in the event of any collision
- Detector from a manufacturer with a large production facility supplying detector panels to other major detector manufacturers

14" x 17" size wireless FPD

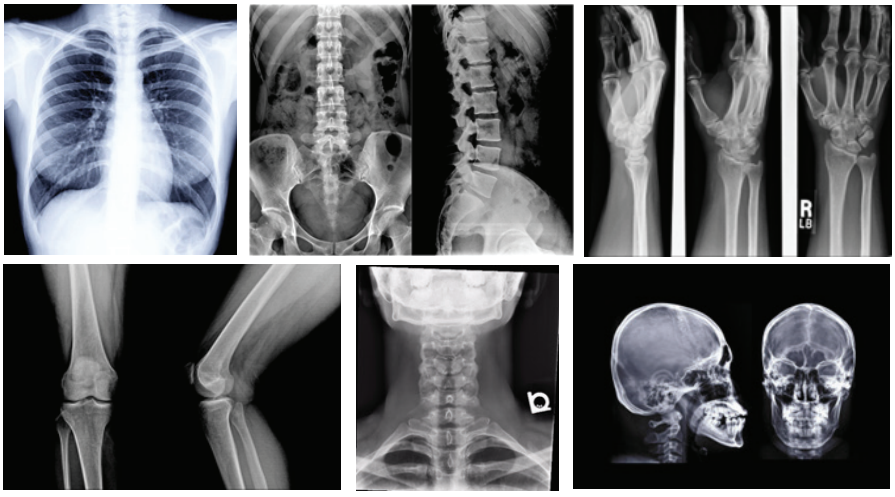

Light-weight

Easy Positioning

Accurate Image

Why Mini 90?

- 100% portable - easy to install
- Hassle-free and cost-efficient
- Light-weight at just 4.0 kg
- Razor-sharp images in lesser time across wider applications
- Comfortable design and flexible

AERB APPROVED
